

## 1.1 Ziel und Realisierung des Projektes MyWebBrowser

Verwendung der Komponente: TWebBrowser aus Komponentenpalette „Internet“

Erzeugen Sie ein neues Projekt „MyWebBrowser“ im gleichnamigen Order.

Editieren Sie die Oberfläche entsprechend der nebenstehenden Abbildung.

Erzeugen Sie Schritt für Schritt den Programmcode, entsprechend dem Beispiel-Code.

```

//-
#include <vcl.h>
#pragma hdrstop
#include "Unit1.h"
//-
#pragma package(smart_init)
#pragma resource "*.dfm"
TForm1 *Form1;
//-
_fastcall TForm1::TForm1(TComponent* Owner)
    : TForm(Owner)
{ }
//-
void __fastcall TForm1::Go_Click(TObject *Sender)
{ this->WebBrowser1->Navigate((WideString)Edit1->Text); }
//-
void __fastcall TForm1::Back_Click(TObject *Sender)
{
    try { this->WebBrowser1->GoBack(); }
    catch(...) {} //allgemeine Fehlerbehandlung
}
//-
void __fastcall TForm1::Forward_Click(TObject *Sender)
{
    try { this->WebBrowser1->GoForward(); }
    catch(...) {} //allgemeine Fehlerbehandlung
}
//-
void __fastcall TForm1::Edit1KeyDown(TObject *Sender, WORD &Key,
    TShiftState Shift)
{ if (Key==0x000d) { Go_Click(Form1); } //wenn Enter, dann Navigate() }
//-
void __fastcall TForm1::Refresh_Click(TObject *Sender)
{ this->WebBrowser1->Refresh2(); }

```

```

}

//-----
void __fastcall TForm1::Stop_Click(TObject *Sender)
{ this->WebBrowser1->Stop();
}
//-----

```

## 1.2 TWebBrowser <http://msdn.microsoft.com/de-de/library/aa752085%28en-us,VS.85%29.aspx>

### 1.2.1 Eigenschaften

|                                   |   |
|-----------------------------------|---|
| <a href="#">Application</a>       | Gets the automation object for the application that is hosting the <a href="#">WebBrowser Control</a> . |
| <a href="#">Busy</a>              | Gets a value that indicates whether the object is engaged in a navigation or downloading operation.     |
| <a href="#">Container</a>         | Gets an object reference to a container.  |
| <a href="#">Document</a>          | Gets the automation object of the active document, if any.  |
| <a href="#">Height</a>            | Sets or gets the height of the object.  |
| <a href="#">Left</a>              | Sets or gets the coordinate of the left edge of the object.   |
| <a href="#">LocationName</a>      | Retrieves the path or title of the resource that is currently displayed.                                |
| <a href="#">LocationURL</a>       | Gets the URL of the resource that is currently displayed.   |
| <a href="#">Offline</a>           | Sets or gets a value that indicates whether the object is operating in offline mode.                    |
| <a href="#">Parent</a>            | Gets the parent of the object.  |
| <a href="#">ReadyState</a>        | Gets the ready state of the object.   |
| <a href="#">RegisterAsBrowser</a> | Sets or gets a value that indicates whether the object is registered as a top-level browser window.     |
| <a href="#">Top</a>               | Sets or gets the coordinate of the top edge of the object.  |
| <a href="#">TopLevelContainer</a> | Gets a value that indicates whether the object is a top-level container.                                |
| <a href="#">Type</a>              | Gets the user type name of the contained document object.   |
| <a href="#">Visible</a>           | Sets or gets a value that indicates whether the object is visible or hidden.                            |
| <a href="#">Width</a>             | Sets or gets the width of the object.   |

### 1.2.2 Methoden

|                             |   |
|-----------------------------|---|
| <a href="#">ExecWB</a>      | Executes a command and returns the status of the command execution using the <a href="#">IOleCommandTarget</a> interface.   |
| <a href="#">GetProperty</a> | Gets the value associated with a user-defined property name.  |
| <a href="#">GoBack</a>      | Navigates backward one item in the history list.  |
| <a href="#">GoForward</a>   | Navigates forward one item in the history list. <a href="#">GoHome</a> Navigates to the current home or start page.   |
| <a href="#">GoSearch</a>    | Navigates to the current search page.   |
| <a href="#">Navigate</a>    | Navigates to a resource identified by a URL or to a file identified by a full path.   |
| <a href="#">Navigate2</a>   | Navigates the browser to a location that might not be expressed as a URL, such as a pointer to an item identifier list (PIDL) for an entity in the Microsoft Windows Shell namespace. |
| <a href="#">PutProperty</a> | Associates a user-defined name/value pair with the object.  |
| <a href="#">Refresh</a>     | Reloads the file that is currently displayed in the object.   |
| <a href="#">Refresh2</a>    | Reloads the file that is currently displayed with the specified refresh level.  |
| <a href="#">Stop</a>        | Cancels a pending navigation or download, and stops dynamic page elements, such as background sounds and animations.  |

### 1.2.3 Ereignisse

|                                    |   |
|------------------------------------|---|
| <a href="#">BeforeNavigate</a>     | Fires before navigation occurs in the given object (on either a window or frameset element).  |
| <a href="#">BeforeNavigate2</a>    | Fires before navigation occurs in the given object (on either a window element or a frameset element).  |
| <a href="#">ClientToHostWindow</a> | Fires to request that the client window size is converted to the host window size.  |
| <a href="#">CommandStateChange</a> | Fires when the enabled state of a command changes.  |
| <a href="#">DocumentComplete</a>   | Fires when a document is completely loaded and initialized.   |
| <a href="#">DownloadBegin</a>      | Fires when a navigation operation begins.   |
| <a href="#">DownloadComplete</a>   | Fires when a navigation operation finishes, is halted, or fails.  |
| <a href="#">FileDownload</a>       | Fires to indicate that a file download is about to occur. If a file download dialog box can be displayed, this event fires prior to the appearance of the dialog box. |
| <a href="#">NavigateComplete</a>   | Fires after a navigation to a link is completed on either a <a href="#">window</a> element or a <a href="#">frameSet</a> element.                                     |
| <a href="#">NavigateComplete2</a>  | Fires after a navigation to a link is completed on a <a href="#">window</a> element or a <a href="#">frameSet</a> element.  |
| <a href="#">NavigateError</a>      | Fires when an error occurs during navigation.   |
